Customisation

Design of packaging and occupational clothing in house style.

Product development

Development of private-label products and unique occupational clothing.

Water treatment

Measurement, testing and treatment of the water quality for horticulture.

Transport

International transport with Euro 6 motors.

We are a safe keeper

Houweling Group advises and develops. We are guarantors of growth and guardians of quality. Our packaging protects products and their environment, our clothing allows the wearer to work safely. Our services save on raw materials from fossil fuel, and our substances stimulate plant growth. We have been doing that since 1925.

Quality, the environment, and safe and healthy working

We are certified: ISO 9001:2015, ISO 14001:2015 and ISO 45001:2018. These norms guarantee that we provide high-quality products and services, protect the environment as far as possible, and optimise our working conditions.

Corporate social responsibility

We strive for sustainable growth for future generations. By developing and marketing circular products ourselves, we contribute to conserving valuable raw materials, reducing the use of raw materials from fossil fuel and shrinking the waste mountain. We also minimise our own environmental impact with solar panels and collecting and reusing rainwater.

Packaging

Our products protect that which has value, limit the risks and ensure a safe environment. Whether you are looking for can packaging, bottles, pots, vases, containers, buckets, jerrycans, IBC containers, crates, trays, pallet boxes or other packaging, we have the expertise and experience to provide the right solution.

Along with new and used packaging, you can turn to us for bottles, jerrycans, buckets and barrels of recycled material. For example, we have developed bottles and jerrycans made entirely from post-consumer recycled (pcr) plastic. Such packaging does not use any new raw materials, saves CO2 and shrinks the waste mountain.

Recoservice

Protect the environment and conserve valuable raw materials through the collection and processing of used packaging, occupational clothing and PPE. Sustainable and circular entrepreneurship is made simpler with our recoservice. We pick up empty, used packaging, occupational clothing and personal protective equipment from you and ensure its reuse or processing of the materials. What is no longer useful for you in its current form can often be made valuable in another way. Our recoservice ensures that you do not need to worry about your waste flow and that valuable raw materials are conserved.

Horticulture

Houweling Horticulture consists of different companies, both in the Netherlands and abroad. Although the products on offer differ from country to country, the common focus is the same everywhere, namely protection of the crop. We do this by offering a wide range of products. For example, protective equipment, crop protection and growth stimulation. Our experienced and expert staff are always ready to support and advise you at every step of the process, from product selection to application and use.

Safety

Houweling Veiligheid supplies a complete package of personal protective equipment, occupational clothing and shoes, ergonomic products and articles for industrial hygiene. In addition, we install, repair and inspect different types of respiratory protection, such as face masks (half and full) and motor units. With our years of experience and extensive knowledge, we are a reliable partner for our customers. Our broad assortment supplies the needs of customers from all conceivable sectors. Our products and services make work not only safer, but also easier and more pleasant. Our enthusiastic and service-oriented team are always happy to help you and make suggestions for solutions.

For safe keeping.

Houweling Group is a family-run company that protects people, plants and products. We ensure a safe environment, now and in the future.
