A reliable partner in the protection of products, plant and people. For safe keeping.
For safe keeping.

Help required with safe keeping?
Our specialists are happy to help you.

We are safe keepers

Houweling Group is a safe place for advice and development. A guarantor of growth and a guardian of quality. With packaging that protects products and their environment and clothing that allows the wearer to work safely. Services that save on fossil raw materials and products that stimulate plant growth. And we've been doing this since 1925.

Quality, environment and safe, healthy working conditions

We are certified ISO 9001:2015, ISO 14001:2015 and ISO 45001:2018. These standards guarantee that we offer high-quality products and services, protect the environment as much as possible and optimise our working circumstances.

Corporate social responsibility

We strive to achieve sustainable growth for future generations. By selling circular products and developing them ourselves we contribute to the conservation of valuable raw materials, reduction in the use of fossil fuels and limitation of waste output. We also reduce our own environmental impact with, among other things, solar panels and rainwater collection.

Products

Our products protect what is of value, limit risks and provide a safe environment.

Biocides

Buckets

Demineralised water

Eye protection and visors

First aid equipment
